Professional Profile

Actuarial & Quantitative Risk Analyst with 3+ years in insurance valuation controls, period-end close and market risk, partnering directly with Accounting and building automated SQL Server/T-SQL, R and VBA controls on reserves, cash flows and capital. Conceived & operates a multi-asset research platform covering macro, SEC/IFRS fundamental analysis (dilution, reverse DCF), technical research, portfolio risk and IBKR-sourced P&L, and multi-agent LLM thesis review for rule-governed execution. Seeking to leverage this dual financial and quantitative expertise in a Market, Quant, or Investment role in Geneva from Q1 2027.

Professional Experience

Sep 2023 – Present
Strasbourg

Actuarial & Risk Analyst

AFI ESCA — Insurer (Burrus Group)

Primary Analyst, Non-Life — Solvency II & Market Risk

- Modelled Solvency II market-risk capital across rates, spreads, equities, FX and concentration, with fund look-through and SCR correlation matrices; validated underlying portfolio exposures and data consistency.
- Calculated Best Estimate, Risk Margin and SCR/MCR under Solvency II for a EUR 30M balance sheet; supported ORSA stress tests and prepared ACPR Pillar 3 reports, including S.29 own-funds movement analysis.

Analyst, Life Insurance — Savings & Investment Products

- Partnered directly with Accounting on period-end close: reserve roll-forwards, accounting-to-technical cashflow reconciliations and contract-level discrepancy reviews for general-account and unit-linked portfolios.
- Developed T-SQL analyses across insurance databases (CTEs, window functions) to reconstruct contract-level reserves from transaction histories, compare with reference valuations, trace interest, fees, and profit-sharing.
- Automated recurring financial reporting and controls using SQL, R and Excel/VBA (50%+ processing time saved; up to 85% on core routine); modelled PRIIPs risk indicators and performance scenarios via Monte Carlo.

May 2022 – Aug 2023
Strasbourg

Asset Management & Investment Risk Analyst — Internship & Work-Study

AFI ESCA

- Ran multi-factor stress tests & asset-impairment scenarios to evaluate portfolio downside and recovery paths.
- Placed and routed daily unit-linked fund orders; handled NAV updates, price feeds and asset inventories.

Quantitative Project

Feb 2026 – Present

IBKR Trading Execution & Portfolio Risk Platform with LLM-Powered Co-Pilot (GitHub Pages: Pre-UI)

- Conceived and co-designed an IBKR-connected investment platform spanning research, P&L, TWR/Modified Dietz returns and portfolio risk (VaR/ES, stress tests), with AI-assisted implementation.
- Built research workflows for 480+ US/EU stocks, combining systematic screening, 5-second market-data signals, multi-horizon technical analysis, historical replay and empirical trade-path studies.
- Structured source-backed SEC/IFRS investment cases analysing earnings quality, capital structure, dilution, liquidity runway, reverse DCF and sector valuations, independently challenged by LLM agents.
- Designed an LLM co-pilot turning natural-language instructions into constraint-optimised OCO/OCA exit plans and graduated portfolio-wide de-risking, subject to live broker-state checks and human approval.

Education

2021–2023 **Master's Degree in Risk & Insurance Management** (Mention Bien – French distinction)

2018–2021 **Bachelor's Degree in Economics & Management — Quantitative Focus** (Mention Bien)

Strasbourg Faculty of Economics and Management (FSEG), University of Strasbourg

Master's thesis (2023): Stress Testing in Insurance — Risk Correlation Matrix

IRIAF Hackathon 2023 | 1st place (team) – IMA workload & staffing forecasts (1M cases, 48h)

Technical Skills

Quant methods	Time-series research, DCF, Monte Carlo, factor attribution, VaR/ES, portfolio stress testing
Professional tools	Microsoft SQL Server (T-SQL), R (data.table), Excel/VBA (daily professional use); LaTeX
Project stack	Python, React/TypeScript, FastAPI, IBKR TWS API, SEC/XBRL, LLM APIs, Git, Linux/VPS (AI-assisted)
Languages	French: Native; English: C1 reading/listening (EF SET), B2 spoken; German: A2
