Professional Profile

Actuarial & Quantitative Risk Analyst with 3+ years in insurance valuation controls, period-end close and market risk, partnering directly with Accounting and building automated SQL Server/T-SQL, R and VBA controls on reserves, cash flows and capital. Conceived & operates an IBKR platform combining macro, firm-level fundamentals (SEC/IFRS dossiers, dilution, reverse DCF), technical research, contextual price alerts, and natural-language LLM workflows for risk-constrained OCO plans and rule-governed execution. Seeking to leverage this dual expertise in a Market, Quant, or Investment role in Geneva from Q1 2027.

Professional Experience

Sep 2023 – Present
Strasbourg

Actuarial & Risk Analyst

AFI ESCA — Insurer (Burrus Group)

Primary Analyst, Non-Life — Solvency II & Market Risk

- Modelled Solvency II market-risk SCR across interest rates, credit spreads, equities and concentration, applying fund look-through, exposure checks, asset classification controls and correlation-based capital aggregation.
- Calculated Best Estimate, Risk Margin and SCR/MCR for a EUR 30M balance sheet; contributed to ORSA stress scenarios and ACPR Pillar 3 reporting, including S.29 own-funds movement analysis and QRT reconciliations.

Analyst, Life Insurance — Savings & Investment Products

- Partnered with Accounting on period-end reserve and cash-flow reconciliations, tracing premiums, fund switches, surrenders, and social contributions to explain and resolve valuation and booking discrepancies.
- Reconstructed policy lifecycles and euro/unit-linked reserves using T-SQL (CTEs, window functions); automated monthly interest and policyholder profit-sharing validations against booked amounts.
- Automated financial reporting and controls using R, SQL and Excel/VBA (50%+ processing time saved; up to 85% on a core routine); contributed to PRIIPs risk indicators and performance-scenario analysis.

May 2022 – Aug 2023
Strasbourg

Asset Management & Investment Risk Analyst — Internship & Work-Study

AFI ESCA

- Analysed asset stresses and impairment scenarios to assess portfolio downside and market-risk sensitivities.
- Placed and routed daily unit-linked fund orders; handled NAV updates, price feeds and asset inventories.

Independent Project — Investment & Technology

Feb 2026 – Present

IBKR Trading Execution & Portfolio Risk Platform with LLM-Powered Co-Pilot (GitHub Pages: Pre-UI)

- Conceived and co-designed an IBKR platform combining technical, macroeconomic and firm-level analysis, fundamental valuation, portfolio risk, and LLM-assisted research and execution under deterministic controls.
- Configured 480+ US/EU equities for systematic screening, integrating 5-second/multi-horizon analysis, quantile-based entry zones and context-annotated price-alert ladders with event-driven thesis reviews.
- Structured, source-backed, and periodically refreshed SEC/IFRS company dossiers covering business quality, competitive moats, dilution, liquidity runway, reverse DCF, and catalysts — challenged through agent analysis.
- Designed an LLM co-pilot for IBKR trade proposals, risk-constrained OCO/OCA exit-ladder optimisation, portfolio de-risking and extended-hours limit execution, with broker-state checks and grouped-exit approval.

Education

2021–2023 **Master's Degree in Risk & Insurance Management** (Mention Bien – French distinction)

2018–2021 **Bachelor's Degree in Economics & Management — Quantitative Focus** (Mention Bien)

Strasbourg — Faculty of Economics and Management (FSEG), University of Strasbourg

Master's thesis (2023): Stress Testing in Insurance — Risk Correlation Matrix

IRIAF Hackathon 2023 | 1st place (team) – IMA workload & staffing forecasts (1M cases, 48h)

Technical Skills

Quant methods	Time-series research, price-path probabilities, bootstrap, walk-forward tests, cash-flow discounting
Programming	Microsoft SQL Server (T-SQL), R (data.table), Excel/VBA, Power Query (daily professional use); LaTeX
Project stack	Python, React/TypeScript, FastAPI, IBKR TWS API, SEC/XBRL, LLM APIs, Git, Linux/VPS (AI-assisted)
Languages	French: Native; English: C1 reading/listening (EF SET), B2 spoken; German: A2
